To Our Customers!

The prospect of a really good crop of strong, healthy Bulbs in 1914 is excellent; not for several years past have the plants looked so well and promising. Quality is our first consideration. Every Bulb we sell is propagated and grown from perfectly sound and healthy stock and true to name and color.

We invite enquiries, and are always glad to advise intending purchasers as to what varieties are best, how and when to plant and care for them.

Soliciting your kind enquiries and orders.

Very truly yours,

Wm RENNIE Co LIMITED.

TIME OF PLANTING.

To the beginner we would particularly emphasize the fact that **now** and not **Spring-time** is the time to plant all kinds of spring flowering bulbs. The larger part of the bulbs offered in this catalogue reach us from Holland early in September, and the sooner they are planted after that the greater will be the measure of success; therefore **order early.**

At the Flower Show held this Spring no flowers were more admired than the gorgeous Darwin and Late Tulips, grown and displayed by an enthusiastic flower lover who has these Tulips for his own pleasure around his own home. His experience and the experience of others shows that Tulips, that is, **"Darwin"** and **"Late"** Tulips, may be grown easily and successfully, and will give giant flowers on long stems. See page 7.

Just a Typical Scene in Old Holland.

A copy will be sent to all our regular customers. **We shall be pleased to mail one to your friends** who purchase seeds and plants by mail.

PLEASE READ CAREFULLY

WHEN SHIPMENTS CAN BE MADE.—The general line of bulbs will be ready for shipment in September. A few kinds (chiefly Roots and Lilies) are not ready for shipment before November, as they are not matured enough to take up before that time. Therefore please note that all general orders will be shipped as soon as received in September, and the balance will be forwarded as early in November as possible.

BULBS BY MAIL OR EXPRESS.—All bulbs herein quoted will be sent to any post office in Canada, prepaid, when ordered at printed prices, except where noted. Postage to Newfoundland—12 cents per lb., or fraction thereof, must accompany all orders, otherwise it will be deducted.

ORDERS.—All orders are filled in rotation as received. We would advise early orders to ensure their being filled complete, as later in the season some varieties become exhausted, when we must reserve the privilege of supplying another sort as near the color as possible, but shall always substitute an equal if not better variety than ordered.

REMITTANCE.—All orders must be accompanied with the cash for full amount of order, which may be sent by Registered Letter, P.O. Order, Postal Note or Express Order.

ADDRESSES.—Please be careful and write your Name, Post Office and Province plainly, that there may be no disappointment by orders being incorrectly sent.

RENNIE'S CHOICE DUTCH HYACINTHS

IN SEPARATE COLORS, FOR BEDDING-OUT OR FORCING.

Good sized flowering bulbs, 15 centimeters (5¾ in. and upwards in circumference), much larger than the Mixed Hyacinth bulbs usually sent out. They are well adapted for open-ground planting, in mixed borders and informal beds, and on account of their low price are also extensively forced for winter blooming and cutting. The list offered below includes nearly every shade of red, white, blue, yellow, etc.

GROWING HYACINTHS OUTDOORS

The bulbs may be planted any time from October to December—the earlier the better. They succeed in any good, well-drained garden soil. Set the bulbs so that the tops will be 3 or 4 inches below the surface and 6 to 10 inches apart. Before very severe weather comes on, cover the beds with straw, leaves or manure to protect them from the frost, but care should be taken that this covering is not too thick, as the bulbs are as likely to be injured by being kept too warm as by freezing. The mulching should be removed in March.

HYACINTHS IN SEPARATE COLORS.

Each, **7c.**; doz., **70c.**, delivered. By Express at purchaser's expense, each, **5c.**; doz., **55c.**; 100, **$3.50.** Mixed colors, per 100, **$3.25.**

DUTCH ROMAN HYACINTHS

ALSO CALLED MINIATURE HYACINTHS.

78. These Hyacinths are excellent for growing in pots, pans or boxes; they bloom very freely, often producing 3 or 4 spikes. They are equally desirable for culture outdoors; they should be planted closer together than the "Dutch Hyacinths." Culture is the same as recommended for the Roman Hyacinths, and they come into bloom after the Roman Hyacinths are exhausted. The flowers are pink, white and light blue in various shades. Each, **5c.**; doz., **40c.**; per 100, **$2.50**, postpaid.

GRAPE HYACINTHS

79. One of the prettiest of early spring flowering bulbs, growing about 6 inches high and throwing up numerous spikes of clear blue or white flowers, which resemble a miniature bunch of grapes. They are hardy and once planted take care of themselves; in clumps or lines they are very effective. 8 to 12 bulbs in a 6-inch pan make a pretty plant for window decoration, blooming at Easter. **Mixed Colors.**—4 for **10c.**; doz., **20c.**; per 100, **$1.00**, postpaid.

WHITE ROMAN HYACINTH—(For Pot Culture)

Early Roman Hyacinths

(FRENCH GROWN.)

A charming class, specially adapted for forcing and house culture, each bulb producing several graceful spikes of delicately perfumed flowers. They may be had in bloom from November till spring, by early and successive plantings. Bulbs may be planted close together, and, in pots and pans of six or more bulbs, are very effective. They are not considered hardy enough for open ground.

A Handsome Bed of Tulips—Belle Alliance with Border of Pottebakker White.

SINGLE EARLY TULIPS

Tulips are universal favorites, and their ease of culture, combined with beauty of form and gorgeous coloring, renders them the most popular bulbs grown for spring bedding, and for winter flowering in the greenhouse and window garden they are incomparable.

For cultural directions see our pamphlet, **"How to Grow Bulbs,"** free with every order.

The letters A, B, C, preceding the varieties, indicate their earliness of Bloom. The A's flower together and are the earliest, B next, etc. The average height in inches is also given to aid in arranging flower beds. ORDER BY NUMBER.

A BED OF MURILLO DOUBLE TULIPS

DOUBLE EARLY TULIPS

While not equal to the single in brilliancy, the double varieties remain much longer in bloom. The early varieties, such as Murillo, Imperator Rubrorum and the Tournesoll, are excellent for forcing. The later sorts will not bear forcing, but are very effective in beds or borders. A combination or solid bed of the pure white and bright scarlet varieties, La Candeur and Rubra Maxima, is especially effective. The average height of each in inches is prefixed, and the letters A, B, C, preceding the varieties, indicate their earliness of bloom. **"How to Grow Bulbs,"** free with every order.

The Darwin Tulips are exceedingly effective when grown in groups of one variety in the garden or her baceous border. As cut flowers they are unsurpassable. They may be forced if brought into the heat not earlier than January. **"How to Grow Bulbs,"** free with every order.

A MAGNIFICENT BULB FOR GROWING IN WATER

CHINESE SACRED LILIES

254. **(The Chinese Shui-Sin-Far).** This sort has been cultivated for unknown ages in the Orient. The Chinese call it the Flower of the Gods, or Flower of Good Luck. Every Chinaman even away from his native land, cultivates them at the proper time and the blooming of the bulbs serves him as an omen for the coming year's luck. Sad indeed is the Celestial whose bulbs refuse him bloom. The enormous bulbs are brought into flower in an incredibly short time, five to six weeks often sufficing. You can really see them grow day by day.

LARGE SELECTED BULBS.—Each 12c., doz. $1.25, postpaid; original baskets containing 30 bulbs, $1.50 per basket (doz. 80c.), by express.

The Grounds of the New General Hospital at Toronto.—Grown from Rennie's Lawn Grass Seed.

IT IS USED BY THOUSANDS FROM HALIFAX TO VICTORIA.

THERE is nothing more attractive than a beautiful lawn around home grounds—the rich, green, velvety turf being the heart and life of all. A lawn may be formed by laying turf or by sowing seed. The gain in time by sodding is so slight as to scarcely be worthy of consideration, while the results obtained by the two methods are not to be compared. The Grasses that compose a pasture sod (generally the kind used for "sodding lawns") are not at all the best sorts for forming a perfect lawn, and will not give a smooth, elegant surface.

RENNIE'S BEST XXX LAWN SEED

Is by far the best mixture of grasses offered for the purpose of quickly producing a permanent lawn. It is prepared from our own formula, and is a careful blending of varieties adapted to producing the thick growth and velvety appearance so much sought after. The grasses composing this mixture grow during different seasons of the year, so that a deep green, velvety sward is maintained year after year, and without burning brown in summer, its constant luxuriance rivalling the famous lawns of Old England. Whether you want to seed a small grass plot in your yard, or a lawn of more pretentious size, you should use this grass mixture.

MAKING A NEW LAWN

We are always pleased to give full information and directions for the establishment of new lawns under any condition of soil.

QUANTITIES TO USE.—1 lb. for 300 sq. ft.; 25 lbs. for one-fourth acre. If a very close matted turf is required, sow double above quantities (1 lb. for 150 ft.). If intended for renovating an old lawn, about half the above quantities are sufficient for a given space.

Regarding KENTUCKY BLUE GRASS, so widely advertised as an ideal lawn grass, it has merits and demerits. Where Blue Grass thrives it eventually makes a good lawn, but it is slow to thicken up, requiring not less than two years to form a good sward, and does not hold its color in hot weather; it will not thrive on acid soils, and a large portion of soil in the lower altitudes is inclined to acidity. Kentucky Blue Grass is used for lawns on limestone soils, but the results of this or any one grass cannot compare with the beauty and fine velvety texture of lawns made with an intelligently blended mixture of grasses of neat, close, interweaving growth, such as compose the Rennie "'XXX" Lawn Grass mixture; and besides, the latter will make a thick, close turf in a few weeks' time.

The Rennie "XXX" Lawn Grass Seed is, relatively speaking, the cheapest seed offered, because, while other lawn grass mixtures on the market will not average over 14 lbs. to the bushel, this, being free of chaff, weighs 20 lbs. per measured bushel. It is also the **purest, cleanest and heaviest** lawn grass seed ever offered, and it is **absolutely free of weed seeds.**

We have made the formation and renovation of lawns a study for years and thousands of the finest lawns and Grass plots in Canada were obtained by following our instructions and using

THE RENNIE "XXX" LAWN GRASS SEED.

May be sown from April to the end of September.
